Low	Hard			X	27
Medium*	Hard	X		X	27
High	Hard		X	X	27
Low	Soft			X	24
Medium*	Soft	X		X	24
High	Soft		X	X	24

* Recommend initial settings

Note: Empty ball slots must be evenly spaced around the pressure plate.

The pattern for the **24 ball setup is 8 balls followed by 1 empty slot.**

Note: *RM 250 OWNERS:* The OEM basket in the RM 250 has large radii at the top of the tangs that prevent full engagement of the tabs on the Rekluse pressure plate. Rekluse recommends running an aftermarket basket like Wiseco's, which has a square corner at top of tang giving more engagement for the Rekluse pressure plate and preventing premature wear.
