Installation:

The Rekluse Motor Sports z-Start Clutch Cover has additional space built into it to accommodate the z-Start Clutch. The clutch cover should be installed using the OEM method of sealing the clutch cover. Use the stock O-ring or stock gasket when installing the Rekluse clutch cover. If the O-ring or gasket is torn or damaged it should be replaced. Do **NOT** use the oversized gasket(s) that were included with your z-Start Clutch.

Warning:

The Rekluse supplied oversized gaskets are to be used with the OEM clutch cover only.

The Rekluse Clutch Cover is oversized therefore increasing the oil capacity of the clutch side of the motor. Additional oil should be added to the clutch side. Use the specified method outlined in the owners manual included with your off road vehicle to determine the proper oil level. The additional oil capacity will be compensated for.
