

CLUTCH PACK REPLACEMENT NOTES

RadiusCX Clutch Product

INSTALLATION GUIDE

The installation guide for the full RadiusCX clutch product is available on the Rekluse website (rekluse.com) and can be used to assist with replacing the clutch pack with this kit. The manual can also be used to install, tune, and maintain your RadiusCX clutch product.

SETUP SHEET

The setup sheet for the full RadiusCX clutch product has also been provided with this clutch pack replacement kit. You will use it to guide your clutch pack installation. The correct setup sheet for your bike is as shown:

BIKE MODEL	PRODUCT	SETUP SHEET
Kawasaki KX450F (16-18)	RMS-7904044	198-7904044
Kawasaki KFX450R ATV (08-14), KLX450R (08-11), KX450F (06-15)	RMS-7904045	198-7904044
Kawasaki KX450F (19+)	RMS-7904046	198-7904046

BASKET SLEEVES

Your clutch pack replacement kit includes new basket sleeves* to replace the used basket sleeves from your RadiusCX clutch. Be sure to use the new basket sleeves provided with the clutch pack kit for best performance.

RESETTING THE INSTALLED GAP

Because your new clutch pack may be slightly different in total thickness than the used clutch pack, perform the “SETTING THE INSTALLED GAP” and “CHECKING FREE PLAY GAIN” sections of the RadiusCX installation guide after installing the new clutch plates.

BREAK-IN

Follow the break-in procedure after the new clutch plates are installed in your bike/ATV. Do this anytime the clutch plates, EXP disk, or wedge pads are replaced.

INCLUDED PARTS

Item #	Item Type	Qty
67	Steel Drive Plate	9 or 10*
69	TorqDrive [®] Friction Disk	7, 8, or 9*
